
Surrogacy. Marina Casini (MPV): " Human trafficking that undermines the dignity of the human person"

An inhuman and degrading practice that disfigures the dignity of women by violating that mysterious bond that develops from the first instant between a mother and the child that is growing inside her womb day after day; an abhorrent practice that negates the dignity and the rights of the child made into an object of sale. In the last few days the images of scores of babies - with numbers increasing every day - born from surrogacy in Ukraine thanks to BioTexCom, a reproductive medicine and mitochondrial replacement clinic, stranded in their cribs in a hotel in Kiev due to the lockdown caused by Covid-19, preventing their "clients", living in other countries, from "picking them up", hit world news. Just like any other commodity, stored in a warehouse waiting to be delivered to the purchaser.
